

Welcome to the CNH Employment Initiative

The CNH Employment Initiative is committed to expanding equitable access to meaningful employment for disadvantaged individuals and families across New York State. We recognize that stable work is more than a paycheck — it is a pathway to dignity, independence, and long-term stability. Yet many of our community members continue to face barriers to entering the workforce, navigating state and federal employment systems, and advancing into positions that allow their talents to flourish.

Our initiative provides a comprehensive, hands-on approach to workforce development, offering individualized support to help participants **obtain and maintain employment** while building the professional competencies needed for sustained success. Through job readiness training, career coaching, credential preparation, and on-the-job support, CNH prepares our clients to confidently step into opportunities across public and private sectors.

Beyond helping individuals secure employment, we are deeply committed to **leadership development**. Our programs integrate training in managerial, supervisory, and executive functioning skills—ensuring that participants are not only workforce-ready but positioned for upward mobility and long-term career growth.

By partnering with employers, government agencies, workforce boards, educational institutions, and community organizations, the CNH Employment Initiative creates a supportive ecosystem where individuals can thrive, families can stabilize, and communities can prosper.

Together, we are building a workforce that reflects resilience, talent, and the unlimited potential of every person we serve.
