

Welcome to the CNH Housing Initiative

The CNH Housing Initiative is dedicated to expanding pathways to stable, dignified, and affordable housing for disadvantaged individuals and families across New York State. We understand that safe and sustainable housing is the foundation of personal growth, family stability, and long-term community wellbeing. For too many New Yorkers—especially those impacted by poverty, justice involvement, or systemic barriers—homeownership and secure housing remain out of reach. We are committed to changing that.

Through a comprehensive, hands-on approach, CNH works to **rehabilitate vacant and distressed buildings**, transforming them into quality homes that are both affordable and accessible. In addition, we provide direct guidance and support throughout the **home-buying and acquisition process**, ensuring that individuals and families have the knowledge, resources, and advocacy they need to navigate financing, legal requirements, and long-term stability planning.

Rooted in a mission of empowerment and restorative opportunity, the CNH Housing Initiative partners with community organizations, housing experts, financial institutions, and local stakeholders to create real, executable pathways to homeownership. By combining practical support with a people-centered approach, we help families move from instability to security, and from temporary shelter to lasting ownership.

Together, we are building stronger communities—one home, one family, and one future at a time.
